EXPERIENCE

Prometheus, Software Engineering Intern | [Github](#)

December 2025 - February 2026

*Contributed to a **Prometheus** project for **TAP** collaborated with engineers and product managers to meet objectives.*

- Contributed to the development of a full-stack web platform supporting the Teacher Accelerator Program, enabling applicants and enrolled users to manage application status, tasks, and program events
- Implemented dynamic dashboard components and embedded external forms using secure iframes and postMessage handling

Tech: JavaScript, Next.js, React, Clerk Auth, HubSpot API, REST APIs, Tailwind CSS

The Marcy Lab School Apprenticeship June 2024 – August 2025

- Completed a 3-month web development apprenticeship focused on self-directed learning and project execution.
- Learned Python and built a full-stack website for a small family business using Django, PostgreSQL, React, and pure CSS.

SOFTWARE PROJECTS

PATCH | [Github](#) | [Link](#)

May 2025

Full-Stack Health Tracker helps users log symptoms, medications, and insulin levels for better patient-doctor communication.

- Served as a backend developer and collaborated in Agile sprints to ensure consistent integration across features
- Developed RESTful API endpoints for logging symptoms, medications, and insulin levels with comprehensive error handling

Tech: JavaScript, React, PostgreSQL, Node.js, Express

Moodio | [Github](#)

June 2025 - August 2025

Full-stack music companion app

- Engineered real-time music streaming using Spotify's Web Playback SDK with OAuth 2.0 authentication, enabling users to play full tracks, track moods, and receive dynamic song recommendations based on emotional patterns.
- Developed a mood analytics system that correlates user emotions with listening habits, featuring a complete CRUD interface for mood logging, historical timeline visualization, and personalized insights.
- Implemented favorites system with heart-button UX across search results, recommendations, and artist pages, with persistent data storage and seamless music playback integration.

Tech: TypeScript, React, SQLite, OAuth 2.0, Spotify Web API & Web Playback SDK

TECHNOLOGIES

Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, Express, Node.js, Knex

Databases: PostgreSQL, SQLite

Tools & Other: Git, REST APIs, Claude, Cursor, Agile, ERD Design, OAuth 2.0, Spotify Web API & Web Playback SDK, Postman, Claude AI tooling, Open AI tooling

EDUCATION

Software Engineering Fellowship - Marcy Lab

School, Brooklyn, NY March 2024 - September 2025

- Completed 2,000 hours of coursework in web development, CS fundamentals, and leadership development
- Regularly presented technical solutions and demos to peers and instructors, receiving feedback and refining communication and delivery techniques.
- Developed proficiency in HTML/CSS, JavaScript, ReactJS, NodeJS, SQL, and Knex.

The Marcy Lab School, Career Launch Accelerator Program Participant

Brooklyn, NY

October 2025 - April 2026

- Participating in a professional development program focused on career growth, technical support, and real-world project experience.
- Participated in a 10-week advanced Python course, with continued focus on backend development and collaborative problem solving.

Amazon Web Services

- Cloud Practitioner Certified.

YES Bed-Stuy Youth Council, Youth Representative,

Brooklyn, NY

April 2026 – Present

- Serve as a Youth Representative on a cross-sector council of young leaders advising on programs and policy decisions that impact youth and young adults across the Bed-Stuy community
- Advocate for community needs by surfacing lived experiences and perspectives to help shape organizational priorities and resources.
